

Georgia Peanut Commission: (UGAT-20-20/21)

Title: To investigate the re-emergence of *Tomato spotted wilt orthospovirus* and its role in increasing yield loss on Peanut in GA.

Principal Investigator(s):

Name	Title	Affiliation	Mailing Address/Email Address
Sudeep Bag	Assist. Professor (Crop Virology)	UGA-Tifton	2360 Rainwater Rd, Tifton GA 31793 sudeepbag@uga.edu

Layman's Summary: (Updates not available)

A new post-doc joined our team in July 2021, and working on multiple projects. We have collected samples in Fall 2021 from the research plots of Dr. Nino Brown. The samples were processed and sent for next-generation sequencing earlier this week. The sequencing data are expected in next 90 days.

Thank you for your support.
