A row of yellow plastic bins filled with pink pellets, likely fertilizer, in an outdoor setting. The bins are arranged in a line, and the background shows some greenery and a building.

**What did we learn from 2023?**

**Do Not Use “2023” as a measuring stick for what you need to do for 2024!**

# WHAT HAPPENS IF ACRES STAY THE SAME OR INCREASE 2024?

Rotation Intervals Decrease: Problems  
Increase

- Fertility
- Pest problems can increase
- Cutting Corners to save time and \$\$\$\$
- Excited for new techniques/products
- Using the Kitchen Sink Approach

\*\*\* This very important in short rotations\*\*\*

# WHAT HAPPENS IF ACRES STAY THE SAME OR INCREASE 2024?

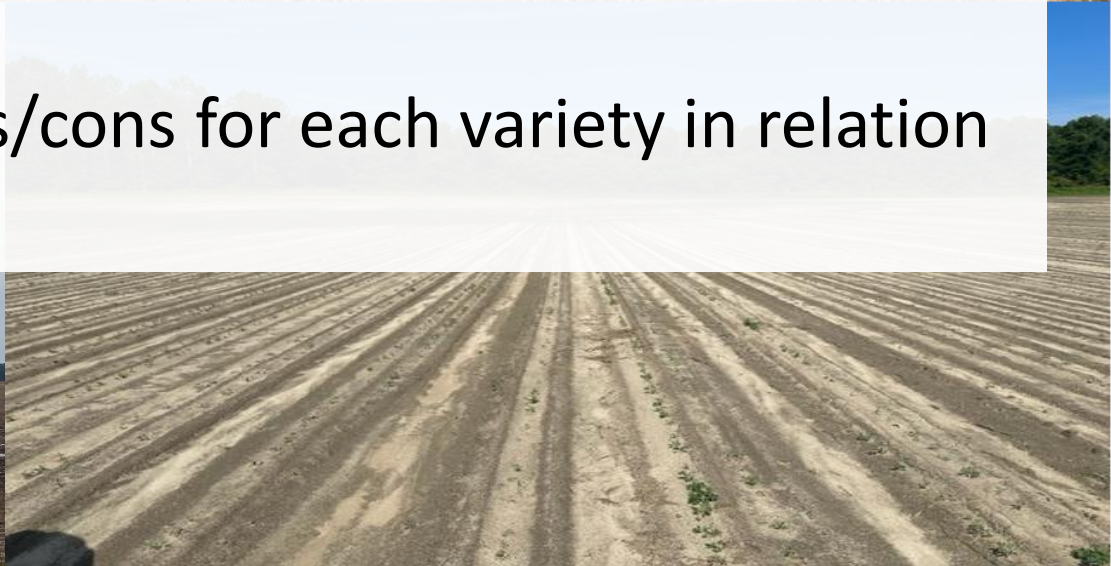

# WHAT HAPPENS IF WE INCREASE ACRES IN 2024?

We Will Need A Larger Planting Window

- Do not plant the whole crop in April
- Spread acres out and know risks for all planting dates
- Understand pros/cons for each variety in relation to planting date

# PLANTING IN APRIL – THINGS TO CONSIDER

## Best Varieties To Plant In April In Regards To TSWV

- Georgia-12Y has the highest level of resistance
  - Limited seed or not desired variety for some growers/shellers
- Georgia-06G > 80% of seed acres
- All other varieties similar/lower compared to Georgia-06G in level of resistance
- More resistant varieties in the near future

## What Will Increase My Success Rate For Planting In April?

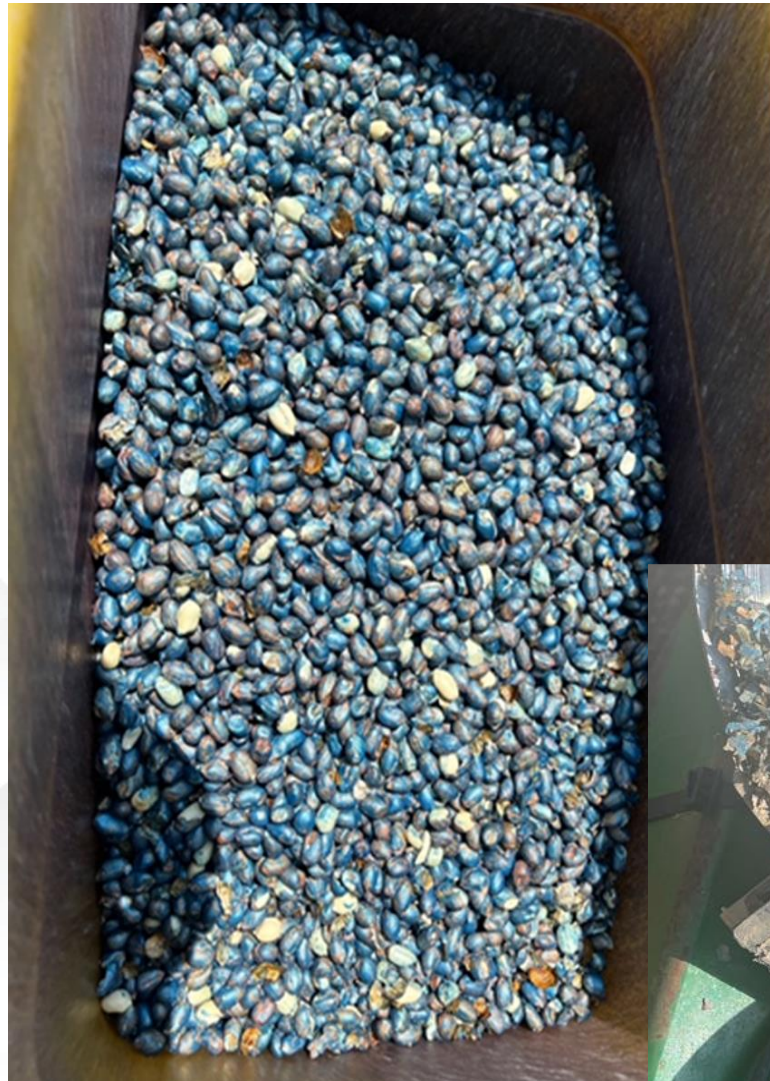

- Peanut RX
  - Variety
  - Plant Population – 6-7 seed/ft (single), 6-8 seed/ft (twin)
  - At Plant Insecticide -- Thimet
  - Row Configuration -- Twin Row
  - Reduced Tillage ??? Cool/wet
- Weather

# WHAT HAPPENS IF WE INCREASE ACRES IN 2024?

## PLANTING IN APRIL – THINGS TO CONSIDER

- Cooler and wetter (on average) = higher risk for stand issues
  - 68 degrees or better average temps in top 4 inches
- Moisture
- Plant high quality seed- What is the Germ and Vigor?
- Seed Depth
- Planting Speed
- Planting Conditions Over Next Week.

# New Liquid/Polymer Seed Treatments: Are They Causing An Issue With Germination And Emergence?

# Good Practices After Planting

Apply Valor ASAP and Irrigate

Assess stand 10-14 DAP- Do I need to replant?

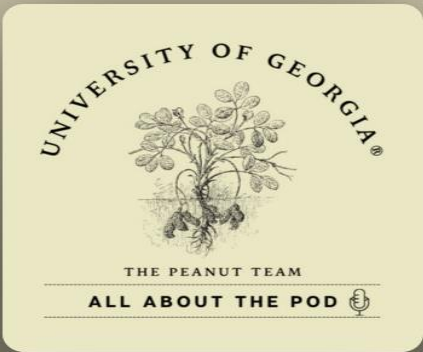

21DAP is magic number for adding more seed

Make sure to Irrigate if **Hot and Dry**

**Call if you need assistance**
